

# Surveys of Enacted Curriculum

## Teacher Orientation

July – August 2022

# Types of Curriculum

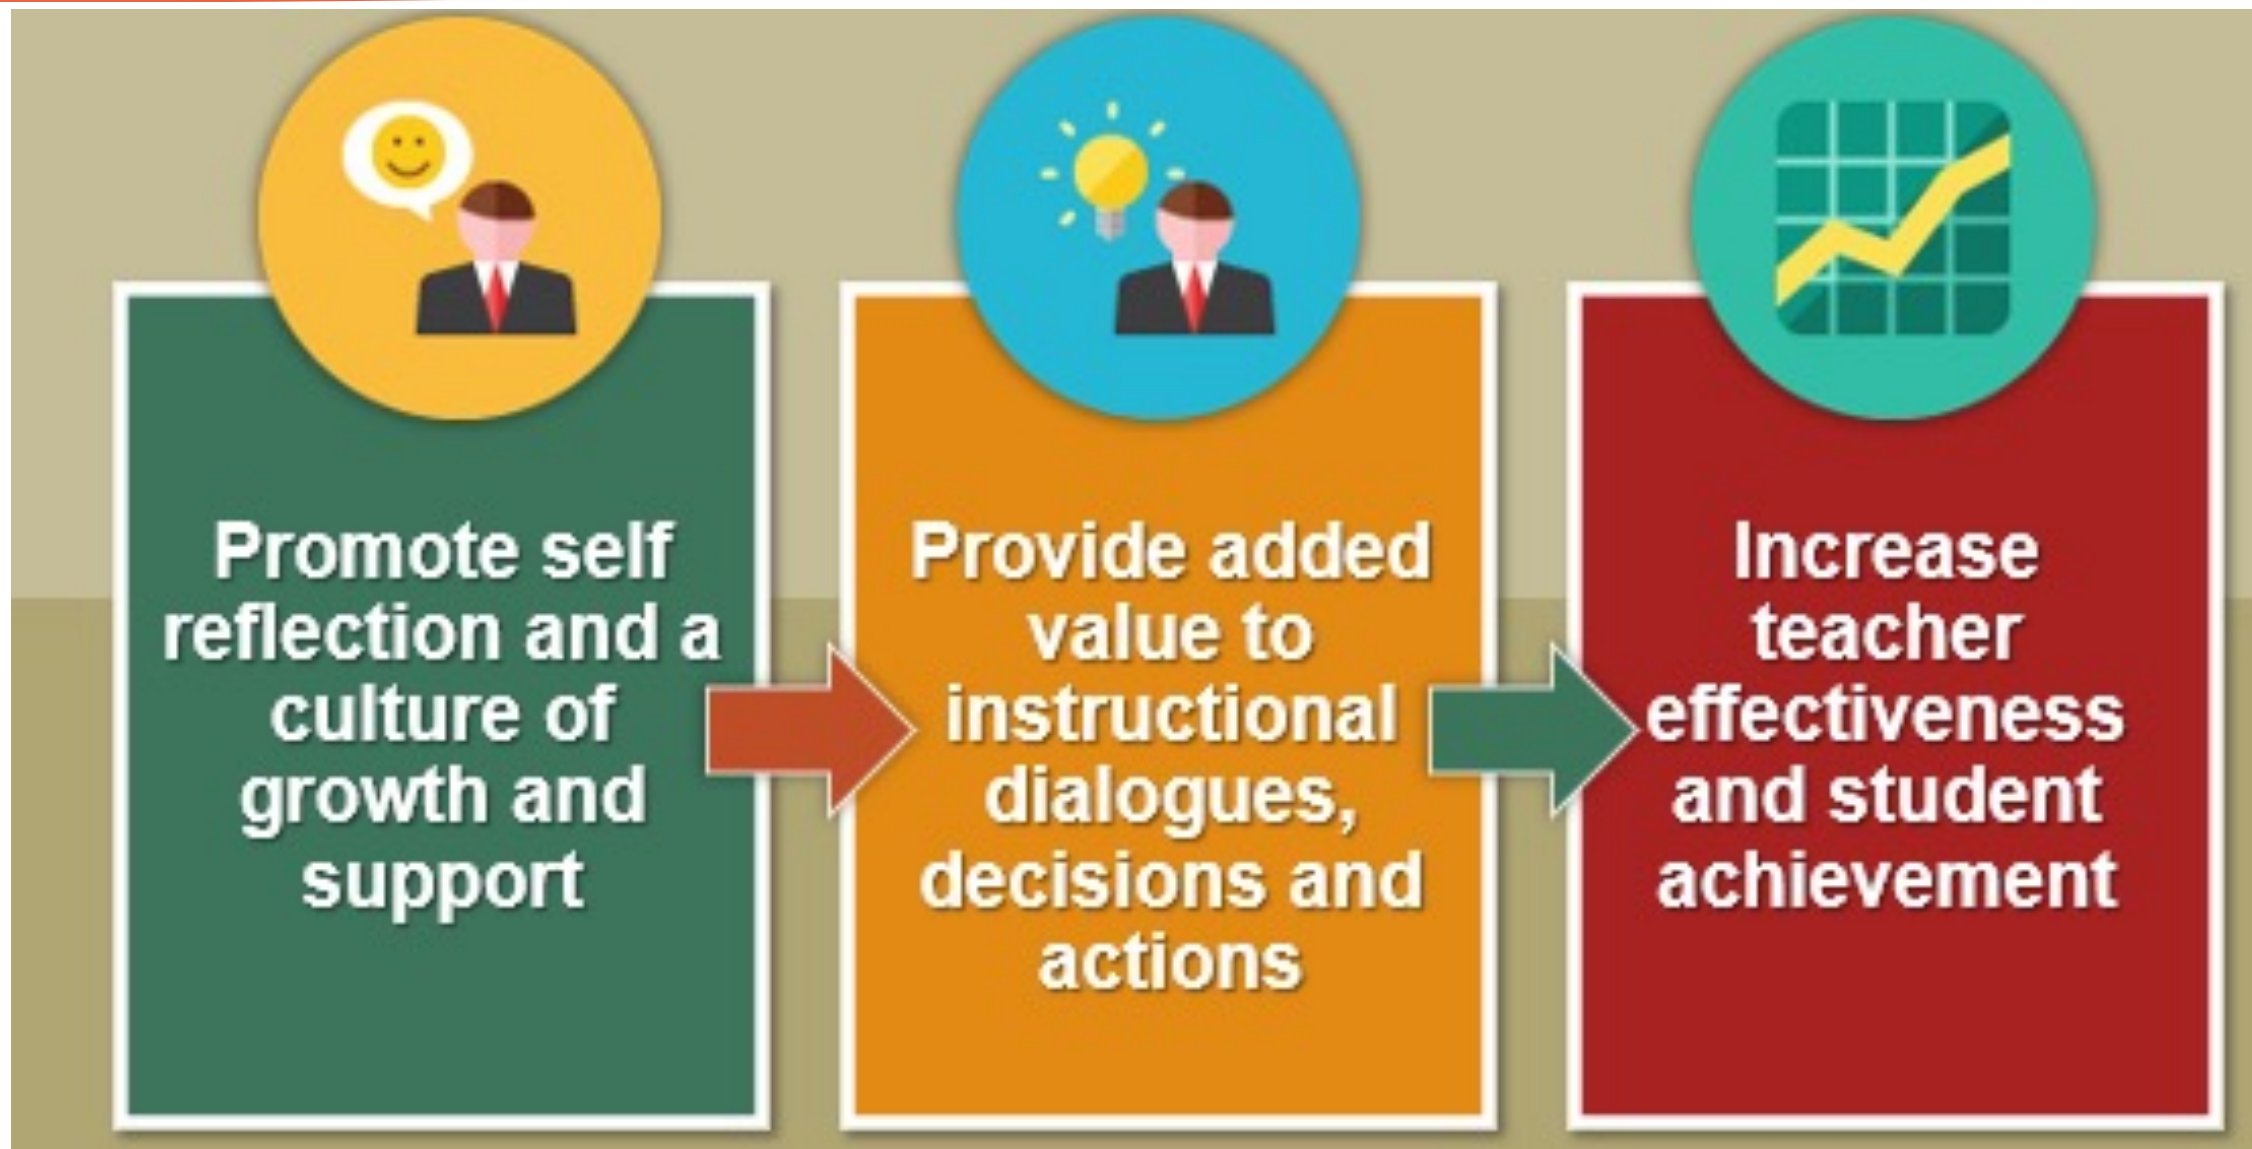

# Goals for Teacher Orientation

# What is the SEC?

# Goals of the SEC

# Why the SEC?

“Regardless of what policy requires or what the curriculum spells out, the classroom teacher ultimately decides what to teach.”

(Porter, 2003)

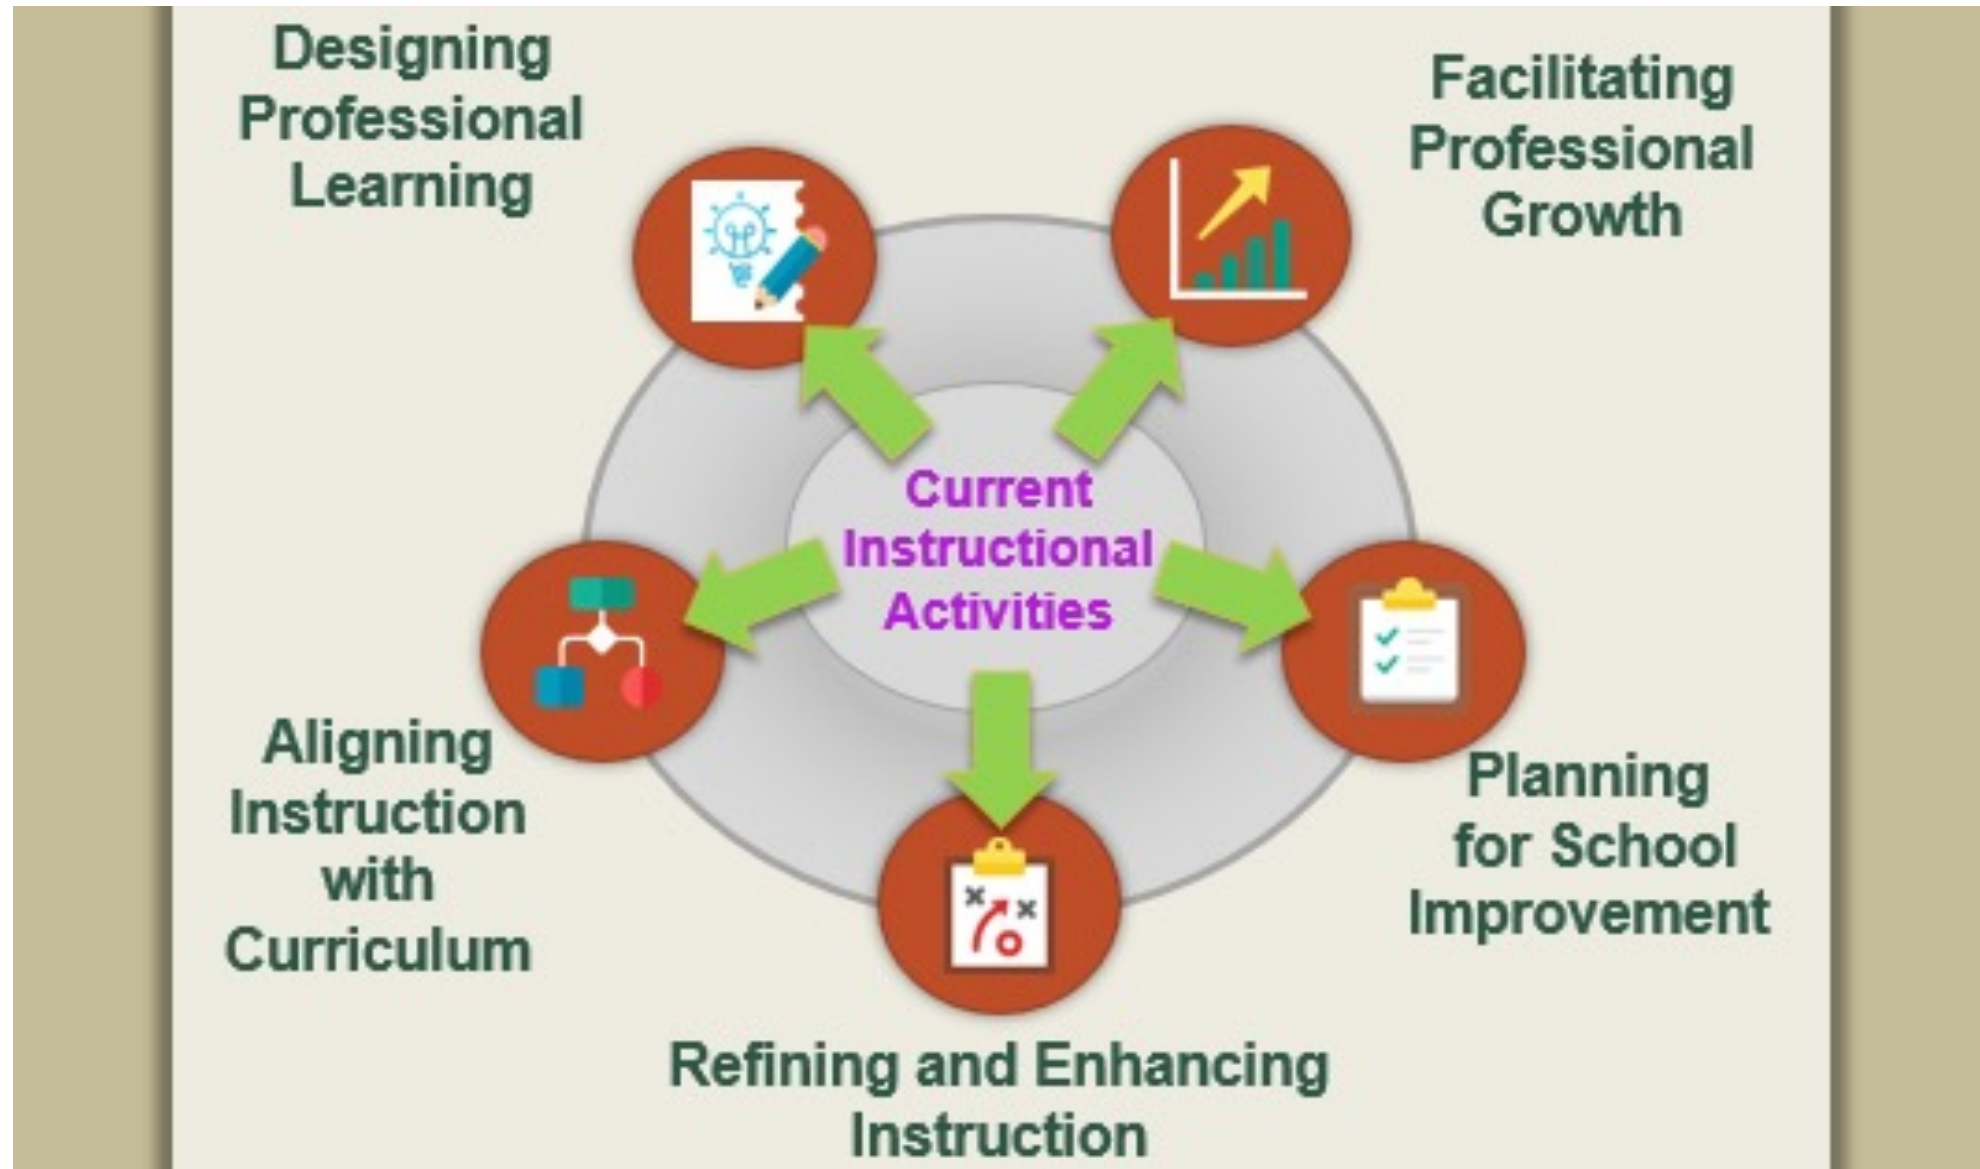

SEC data – fully anonymized!

# How to use the SEC

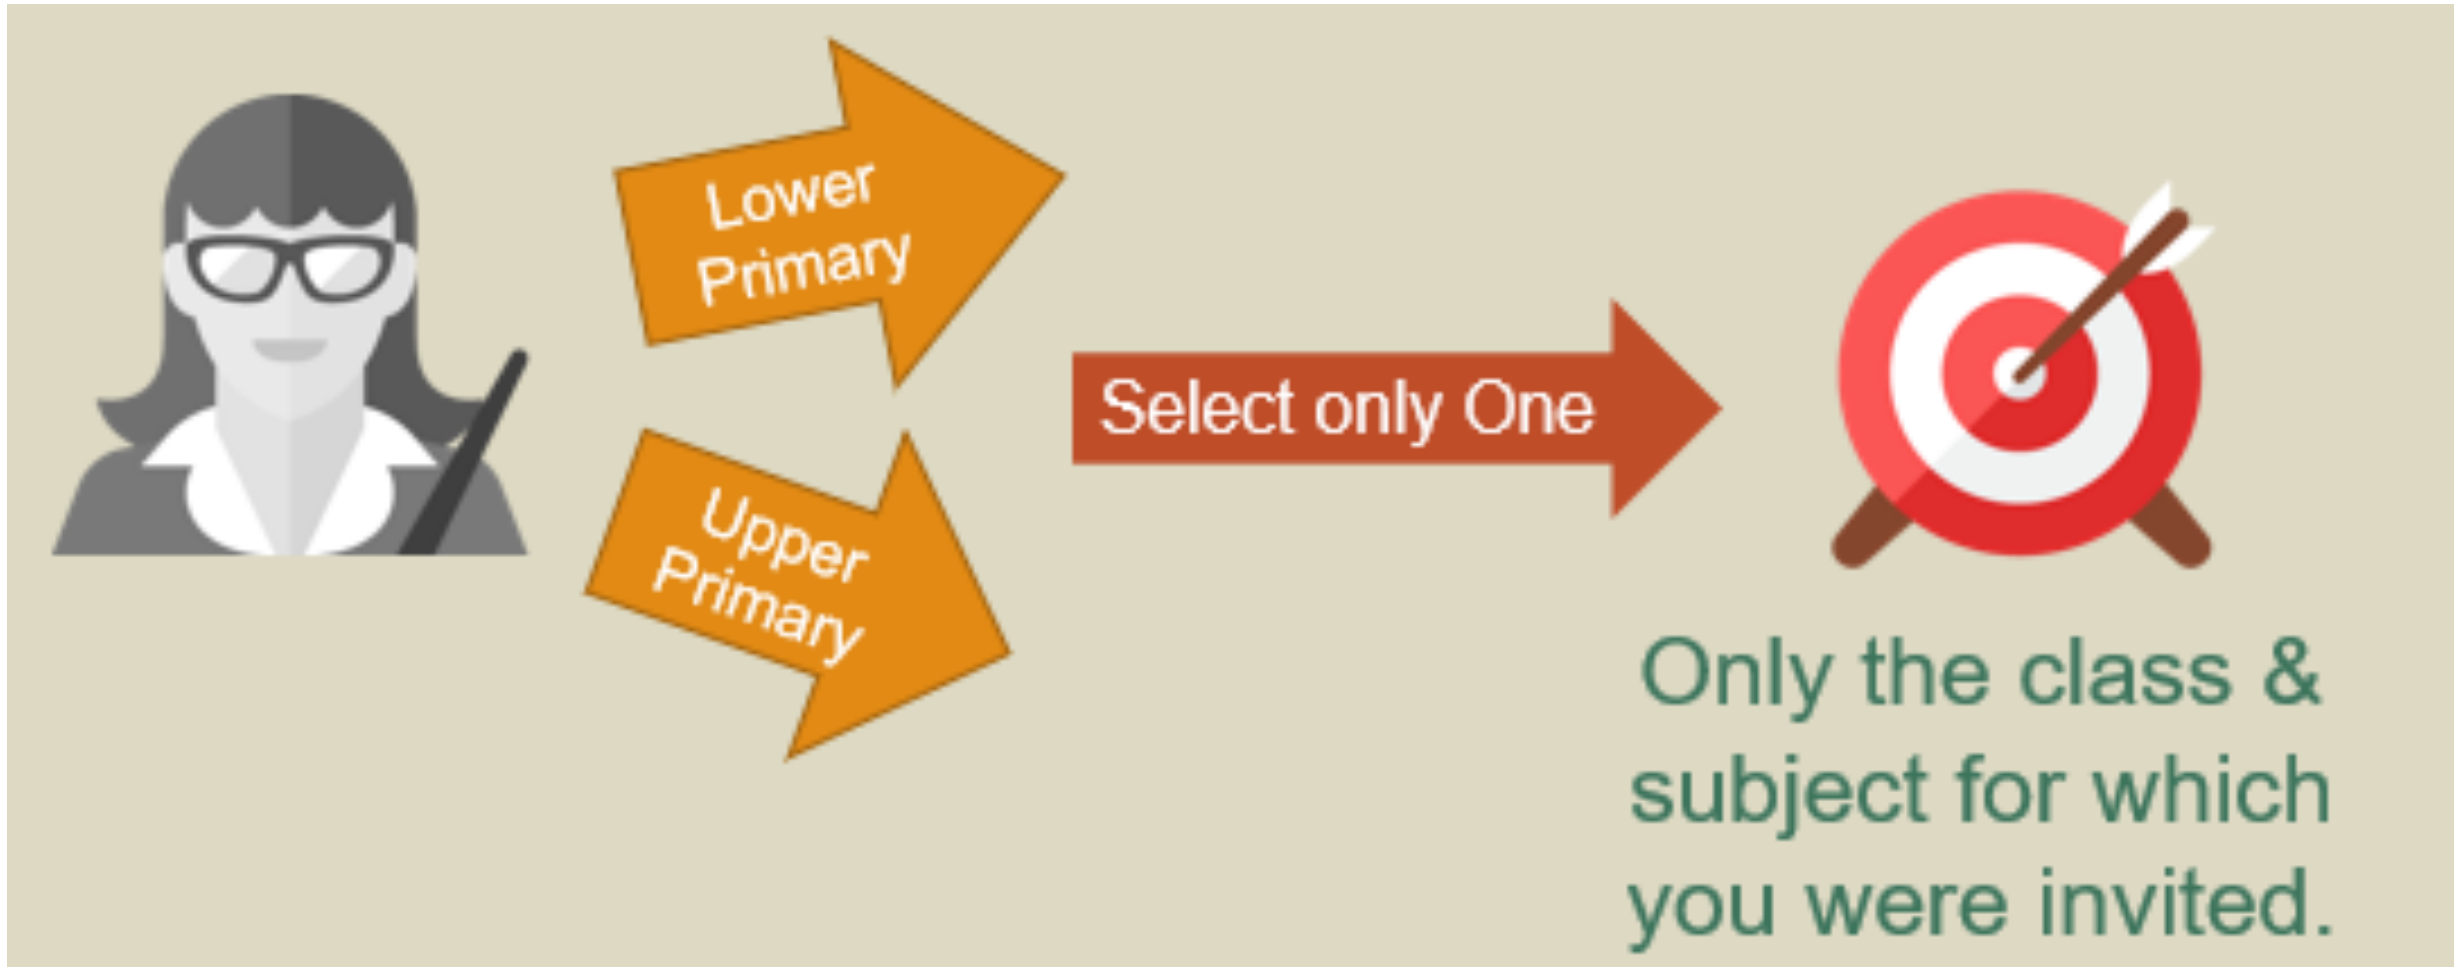

# How teachers were selected

Schools	English Language teachers						Mathematics teachers					
	P1	P2	P3	P4	P5	P6	P1	P2	P3	P4	P5	P6
School 1	1	0	0	0	0	0	0	0	0	0	0	1
School 2	0	1	0	0	0	0	0	0	0	0	1	0
School 3	0	0	1	0	0	0	0	0	0	1	0	0
School 4	0	0	0	1	0	0	0	0	1	0	0	0
School 5	0	0	0	0	1	0	0	1	0	0	0	0
School 6	0	0	0	0	0	1	1	0	0	0	0	0

- Oyo state, Jigawa state
- 100 public primary schools, 50 from each state
- Schools were randomly selected
- Two teachers per school – Mathematics & English language

# Choosing a Target class

Teachers to select only ONE class to be the target class. All their survey responses will relate to this specific class

# Key questions addressed by the SEC

How classroom instruction aligns with curriculum syllabus standards.

How teachers allocate instructional time in relation to the content they teach.

Where teacher focus is, in terms of cognitive demand for learners.

How classroom instruction varies within a content area and/or class.

What instructional activities are being used the most and the least.

# Cognitive Demand & the SEC

The quality of data we will get from teachers will heavily depend on how well they understand 'Cognitive Demand'.

# LESSON PLAN

Objectives  
and Goals

Materials and Equipment

Anticipatory Set

?

Direct Instruction

Guided Practice

Independent Practice

Closure

Assessment  
and Follow-Up

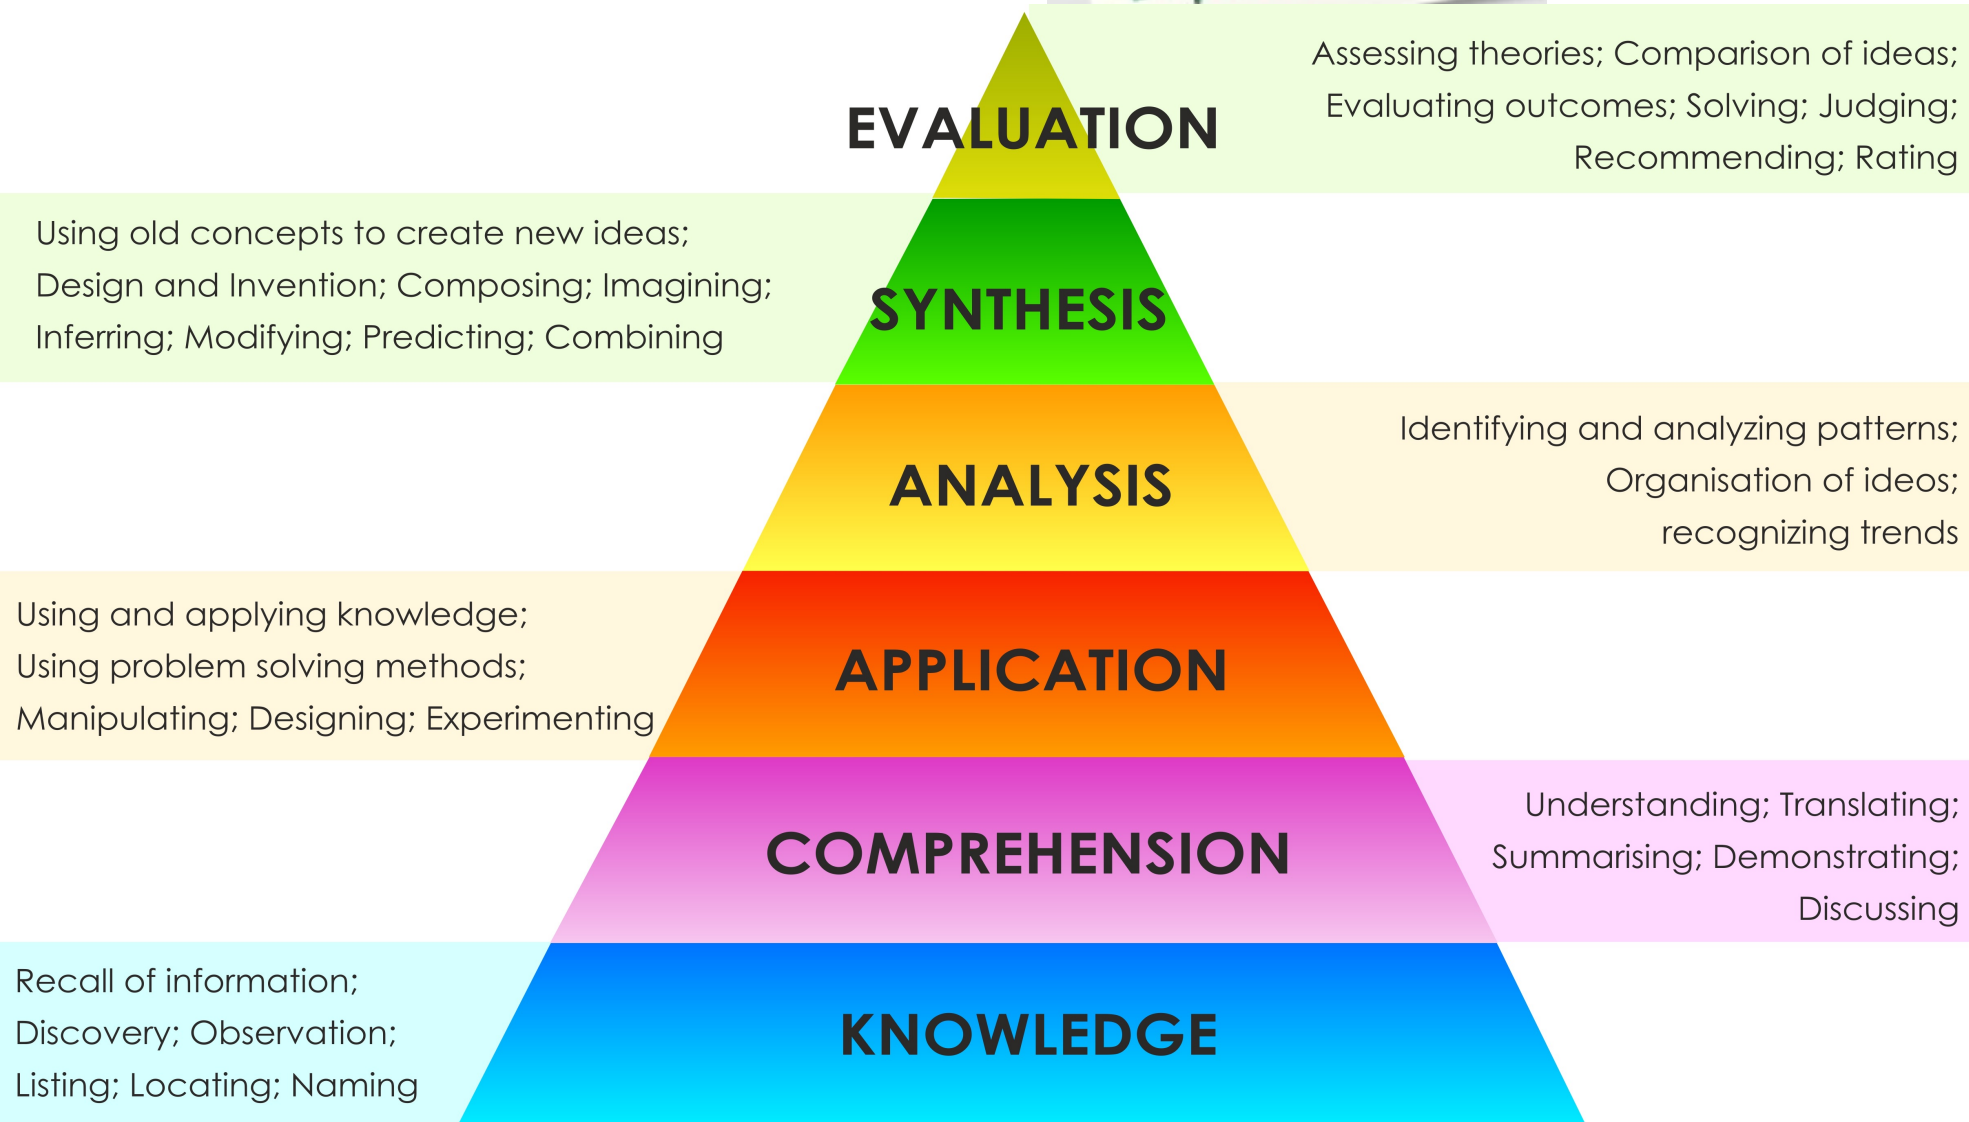

# What makes these good lesson objectives?

1. Students will be able to categorize types of animals into the correct classes with a graphic organizer after reading an article on animal traits.
2. By the end of the reading lesson, students will be able to identify the rising action, climax, and falling action on a plot diagram.
3. Students will be able to apply their knowledge of the writing process to a peer editing session in which they provide at least five peers with valid feedback.
4. After a lesson on the Pythagorean Theorem, students will be able to correctly solve at least 8 out of 10 geometry problems using the theorem.
5. Students will be able to evaluate their classmates' arguments in a Socratic seminar by taking Cornell notes during each discussion.
6. Students will be able to accurately name the parts of a compass rose after learning a song about the cardinal directions.
7. After a lesson on place value, students will be able to estimate how many lemons they would need to start a lemonade stand during a class discussion.

# What is cognitive Demand?

## Crash course on Bloom's Taxonomy

a.k.a  
Performance  
Expectations

**Find your verb in Bloom's Taxonomy. If it's not there, change your objective. If it is there, see if you can move it up one level of complexity.**

**Students will be able to categorize types of animals into the correct classes with a graphic organizer after reading an article on animal traits. Student**

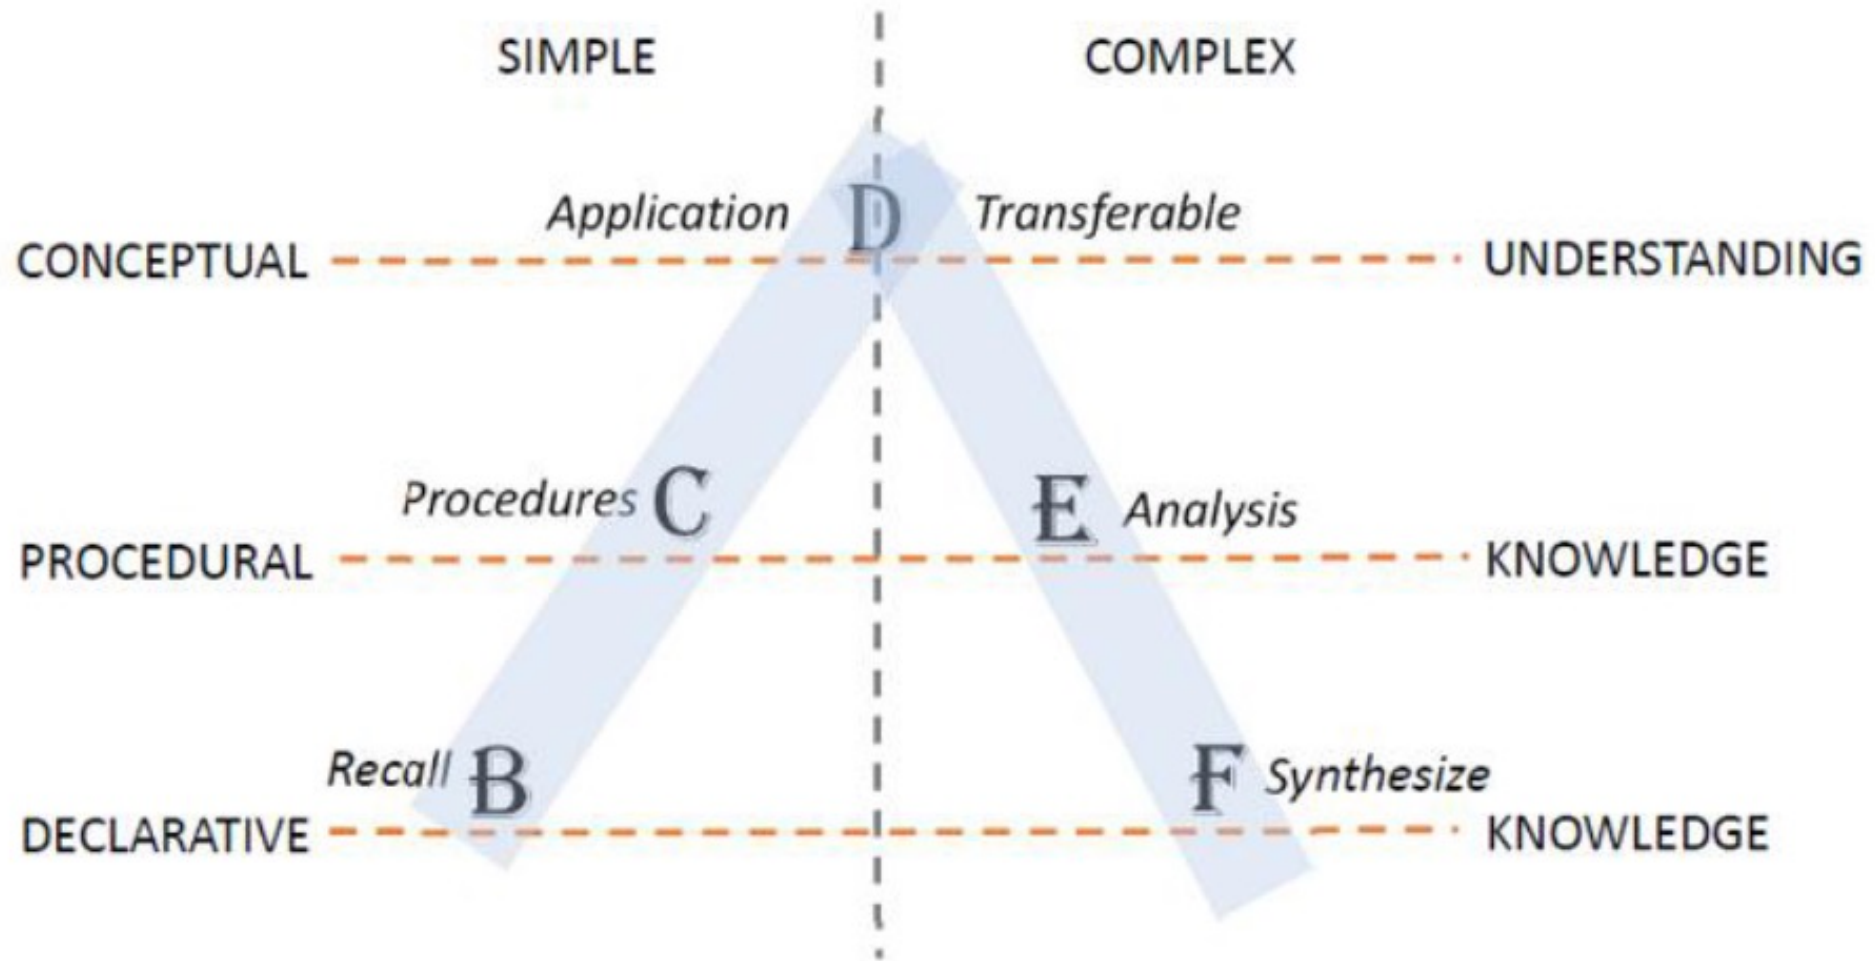

# What is Cognitive Demand?

Bloom's taxonomy	Remember	Understand	Apply	Analyze	Evaluate	Create
WCER SEC	Memorize	Perform procedures	Demonstrate understanding	Analyze	Integrate	
Webb's DoK	Recall	Skill & Concept	Strategic thinking	Extended thinking		

<sup>1</sup> Cognitive demand relates to the type and level of thinking required of the learner in order to sufficiently engage with the task.

# COGNITIVE COMPLEXITY

ACQUIRE → USE → EXTEND

# Why is it important?

More prepared  
to take the  
survey

Survey data  
are more  
accurate

Helps align  
instruction and  
assessments  
to standards

# Cognitive Demand Categories for Mathematics

Memorize Facts, Definitions, Formulas	Perform Procedures	Demonstrate Understanding of Mathematical Ideas	Conjecture, Analyze, Generalize, Prove	Solve Non-Routine Problems / Make Connections
<u>Recite basic mathematical facts</u>	<u>Use numbers to count, order, denote</u>	<u>Communicate mathematical ideas</u>	<u>Determine the truth of a mathematical pattern or proposition</u>	<u>Apply and adapt a variety of appropriate strategies to solve non-routine problems</u>
<u>Recall mathematics terms and definitions</u>	<u>Do computational procedures or algorithms</u>	<u>Use representations to model mathematical ideas</u>	<u>Write formal or informal proofs</u>	<u>Apply mathematics in contexts outside of mathematics</u>
<u>Recall formulas and computational procedures</u>	<u>Follow procedures / instructions</u>	<u>Explain findings and results from data analysis strategies</u>	<u>Recognize, generate or create patterns</u>	<u>Apply to real world situations</u>
	<u>Solve equations/formulas/routine word problems</u>	<u>Develop/explain relationships between concepts</u>	<u>Find a mathematical rule to generate a pattern or number sequence</u>	<u>Synthesize content and ideas from several sources</u>
	<u>Organize or display data</u>	<u>Show or explain relationships between models, diagrams, and/or other representations</u>	<u>Make and investigate mathematical conjectures</u>	
	<u>Read or produce graphs and tables</u>		<u>Identify faulty arguments or misrepresentations of data</u>	
	<u>Execute geometric constructions</u>		<u>Reason inductively or deductively</u>	

# Cognitive Demand Categories for English Language

Memorize / Recall	Perform Procedures / Explain	Generate / Create / Demonstrate	Analyze / Investigate	Evaluate/Integrate
<u>Reproduce sounds or words</u>	<u>Follow instructions</u>	<u>Create / develop connections among text, self, world</u>	<u>Categorize / schematize information</u>	<u>Determine relevance, coherence, internal consistency, logic</u>
<u>Provide facts, terms, definitions, conventions</u>	<u>Give examples</u>	<u>Recognize relationships</u>	<u>Distinguish fact and opinion</u>	<u>Assess adequacy, appropriateness, credibility</u>
<u>Locate literal answers in text</u>	<u>Check consistency</u>	<u>Dramatize</u>	<u>Compare and contrast</u>	<u>Test conclusions, hypotheses</u>
<u>Identify relevant information</u>	<u>Summarize</u>	<u>Order, group, outline, organize ideas</u>	<u>Identify with another's point of view</u>	<u>Synthesize content and ideas from several sources</u>
<u>Describe</u>	<u>Identify purpose, main ideas, organizational patterns</u>	<u>Express new ideas (or express ideas newly)</u>	<u>Make inferences, draw conclusions</u>	<u>Integrate with other topics and subjects</u>
	<u>Gather information</u>	<u>Develop reasonable alternatives</u>	<u>Predict probable consequences</u>	<u>Critique</u>
			<u>Generalize</u>	

# Groping for Activities

**Primary  
English**

**Primary  
Math**

## Activity2: Cognitive Demand Wheel – ELAR (45 mins)

## Activity3: Unwrapping Syllabus Standards – ELAR

- Another activity you can do with teachers is to unwrap some performance objectives in the syllabus standard to determine the cognitive demand or performance expectation for students.
- This can build a common understanding around how syllabus standards are written with an inherent cognitive demand or performance expectation.
- So, how do you figure out what thinking level a standard is targeting?

## Activity2: Unwrapping Assessment Items – ELAR

- Another activity you can do with teachers is to unwrap some assessment items to determine the cognitive demand or performance expectation for students.
- This can build a common understanding around how assessment items are developed with an inherent cognitive demand or performance expectation.
- So, how do you figure out what thinking level an assessment item is targeting?

- Another activity you can do with teachers is to unwrap some assessment items to determine the cognitive demand or performance expectation for students.
- This can build a common understanding around how assessment items are developed with an inherent cognitive demand or performance expectation.
- So, how do you figure out what thinking level an assessment item is targeting?

# Survey organization

Taxonomy as a comprehensive coding/classification document that systematically lists/categorizes all relevant subject-specific educational content (to be covered during a learning cycle) under topics and subtopics intended to facilitate the teaching and learning process.

Please read each question and its response choices carefully, and then mark your response by filling in an appropriate response circle. A pen or pencil may be used to complete the survey.

## CLASS DESCRIPTION

CD.1	What class/grade do you teach?	① 1	② 2	③ 3	④ 4	⑤ 5	⑥ 6				
CD.2	How many arms are in the class/grade level that you teach, it	① None		① 1	② 2	③ 3	④ 4				
CD.3	How many students are in the target class?	① 20 or fewer				③ 41 to 50		⑥ 71 to 80			
		① 11 to 30				④ 51 to 60		⑦ more than 80			
		② 31 to 40				⑤ 61 to 70					
CD.4	What percentage of the students in the target class speak the local language? (Mark nearest 10%)	① Less than 10	① 10	② 20	③ 30	④ 40	⑤ 50	⑥ 60	⑦ 70	⑧ 80	⑨ 90+ %
CD.5	How many students with significant learning difficulties or intellectual disabilities are in the target class?	① None	① 1	② 2	③ 3	④ 4	⑤ 5	⑥ more than five			
CD.6	<u>During a typical week</u> approximately how many hours will

# Completing the survey – step 1

## Step 1: Indicate topics not covered in this class

Begin by reviewing the entire list of topics identified in the topics column of each table, noting how topics are grouped. After reviewing each topic within a given grouping, if none of the topics listed within that group receive any instructional coverage, circle the "<None>" in the "Time on Topic" column for that group. For any individual topic that is not covered in this mathematics class, fill in the circled "zero" in the "Time on Topic" column. (Not necessary for those groups with "<None>" circled.) Any topics or topic groups so identified will not require further response. [Note, for example, that the class described in the example below did not cover any topics under "Instructional Technology" and so "<None>" is circled.]

	4	Fluency	Memorize/Recall	Perform Procedure/Explain	Generate/Create/Demonstrate	Analyze/Investigate	Evaluate
① ① ② ③	401	Phrasing, intonation, and inflection	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②
① ① ② ③	402	Automaticity of words and phrases (e.g. sight and decodable words)	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②
① ① ② ③	403	Reading pace and accuracy	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②

Step 1

Step 2

<i>Time on Topic</i>		<i>K-6 Mathematics Topics</i>	<i>Expectations for Students in Mathematics</i>					
<none>	1	Number and Numeration	Memorize / Recall	Perform Procedures	Demonstrate / Communicate Understanding	Conjecture, Analyze/ Generalize	Integrate / Synthesize / Critique	
① ① ● ③	101	Whole numbers	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
● ① ② ③	102	Place value	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
① ① ② ●	103	Abacus	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
● ① ② ③	104	Operations (addition, subtraction, multiplication, division)	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
① ① ● ③	105	Fractions	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
① ① ● ③	106	Decimals	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
● ① ② ③	107	Percentages	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
① ① ② ●	108	Ratio and proportion (direct/inverse)	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
● ① ② ③	109	Ordering of whole numbers	p ① s ②	p ① s ②	p ① s ②	p ① s ②	p ① s ②	
<none>	6	Basic Operations	Memorize / Recall	Perform Procedures	Demonstrate / Communicate Understanding	Conjecture, Analyze/ Generalize	Integrate / Synthesize / Critique	
① ① ② ③	601	Addition of whole numbers	p ①	p ①	p ① s	p ①	p ①	

## STEP 2: Indicate amount of time spent on each topic covered in this class.

Examine the list of topics a second time. This time note the amount of coverage devoted to each topic by filling in the appropriately numbered circle in the “Time on Topic” column, based upon the following codes:

**0 = None, not covered**

**1 = Slight Coverage**

(less than one class/lesson)

**2 = Moderate Coverage**

(one to five classes/lessons)

**3 = Sustained Coverage**

(more than five classes/lessons)

**Step 1**

**Step 2**

<i>Time on Topic</i>		<i>Grades K-12 ELAR Topics</i>	<i>Expectations for Students in English/Language Arts/Reading</i>						
<none>	4	Concept of print	Memorize/ Recall	Perform Procedure/ Explain	Generate/ Create/ Demonstrate	Analyze/ Investigate	Evaluate		
① ① ② ●	301	Book handling	p ① s ②	p ① ②	s p ① s ②	p ① s ②	p ① s	p ① s	
① ① ● ③	302	Directionality; sequence of text	p ① s ②	p ① ②	s p ① s ②	p ① s ②	p ① s	p ① s	
① ● ② ③	303	Parts of a book (e.g., cover, title, front, and back)	p ① s ②	p ① ②	s p ① s ②	p ① s ②	p ① s	p ① s	
① ① ② ●	304	Letter, word, and sentence distinction	p ① s ②	p ① ②	s p ① s ②	p ① s ②	p ① s	p ① s	

## STEP 3: Indicate relative emphases of each student expectation for every topic taught.

The final step in completing this section of the survey concerns your expectations for what students should be able to do. For each topic listed, please indicate the performance expectations that you consider to be the primary goal of your instruction on that topic, as well as the performance expectation that most supports or helps to scaffold the primary performance expectation.

<b>Primary</b>	Indicate the performance expectation that represents the primary performance goal for instruction on this topic at this grade level for this class of students.
<b>Supporting</b>	Indicate the performance expectation that most supports (provides scaffolding) for achieving the goal indicated by the primary performance expectation

### Step 3

<i>Time on Topic</i>		<i>Grades K-12 ELAR Topics</i>	<i>Expectations for Students in English/Language Arts/Reading</i>				
<none>	3	Concept of print	Memorize/Recall	Perform Procedure/Explain	Generate/Create/Demonstrate	Analyze/Investigate	Evaluate
①①②●	301	Book handling	p ● s ②	p ① s ●	p ① s ②	p ① s ②	p ① s ②
①①②●	302	Directionality; sequence of text	p ① s ②	p ① s ②	p ● s ②	p ① s ●	p ① s ②
①●②③	303	Parts of a book (e.g., cover, title, front, and back)	p ● s ②	p ① s ●	p ① s ②	p ① s ②	p ① s ②

# Example: Primary & Supporting - Mathematics

## Objective:

Identify the value of the number in the tens place, e.g., the 5 in 53 represents 5 tens or 50.

Primary Expectation: The learners must **Demonstrate Understanding** of the mathematical idea of place value to be able to identify the correct number.

Supporting Expectation: The learners will **perform the procedure** of using place value charts and straws to represent number of days.

# Example: Primary & Supporting - ELAR
